## INTERNATIONAL-TYPE SEARCH REPORT

(PCT Article 15.5)

National application No. 0203226-6	Country or Office of SE	f filing	Applicant's or agent's file reference PU0284-SE						
Filing date (day/month/year)		(Earliest) Priority Date (day month year)							
31 October 2002									
Applicant									
AMERSHAM BIOSCIENCES AB									
	1	· · · · · · · · · · · · · · · · · · ·							
Date of request for international-type se	earcn		e search request No.						
31 October 2002	<u> </u>	SE 02/01004							
This international-type search report h to the applicant.  This international-type search report of the international search report the international search report has been search report in the international search report of t	consists of a total of	5 sheets.							
1. Certain claims were found un	searchable (See Box 1	).							
2. Unity of invention is lacking (	(See Box II).								
3. The international application international-type search was	contains disclosure of carried out on the ba	f a nucleotide and/o	or amino acid sequence listing and the listing						
file	ed with the internation	al application.							
[ fur	nished by the applican	nt separately from t	the international application,						
	but not accor	npanied by a stater beyond the discloss	nent to the effect that it did not include ure in the international application as filed.

### INTERNATIONAL-TYPE SEARCH REPORT

Box I	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)							
This international-type search report has not been established in respect of certain claims for the following reasons:								
1.	Claims No.: because they relate to subject matter not required to be searched by this Authority, namely:							
2.	Claims No.: 1-19 (partially) because they relate to parts of the national application that do not comply with the prescribed requirements to such an extent that no meaningful international-type search can be carried out, specifically:  see next sheet							
Box II	Observations where unity of invention is lacking (Continuation of item 2 of first sheet)							
Tills lines	rnational Searching Authority found multiple inventions in this application, as follows:							
1.	As all required additional search fees were timely paid by the applicant, this international-type search report covers all searchable claims.							
3.	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.  As only some of the required additional search fees were timely paid by the applicant, this international-type search report covers only those claims for which fees were paid, specifically claims No.:							
4.	No required additional search fees were timely paid by the applicant. Consequently, this international-type search report is restricted to the invention first mentioned in the claims, it is covered by claims No.:							
Remark	on Protest  The additional search fees were accompanied by the applicant's protest.  No protest accompanied the payment of additional search fees.							

Form PCT/ISA/201 (continuation of first sheet) (July 1992)

### INTERNATIONAL-TYPE SEARCH REPORT

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

#### Continuation of:

Claims 1-6 relate to a compound containing a binding pocket. The compound is not considered to be sufficiently defined. It is even uncertain whether the binding pocket is sufficiently defined by the structure coordinates in order to be reproducibly generated.

Present claims 1-8 relate to an extremely large number of possible compounds. Support within the meaning of Article 6 PCT and disclosure within the meaning of Article 5 PCT is to be found, however, for only a very small proportion of the compounds claimed. In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible.

Consequently, the search has been carried out for those parts of the claims which appear to be supported and disclosed, namely those parts related to a compound consisting of the IgG kappa constant region (either the light chain alone or in combination with the heavy chain).

Claims 9-19 relate to methods and uses of the compound or binding pocket. Support within the meaning of Article 6 PCT and disclosure within the meaning of Article 5 PCT is not considered to be sufficient. Since no ligands identified by the methods have been named it is not considered that the description is sufficiently clear and complete for the invention to be carried out by a person skilled in the art.

Form PCT/ISA/201 (Supplemental Box) (July 1992)
